

SMARTen up you boardroom meetings

SMART BOARDROOM TECHNOLOGY

Smart Interactive Whiteboard

With the push of a button, the SMARTboard interactive whiteboard puts you in control of a powerful multimedia environment. Make notes on an interactive display, write over any application, image or video and save your notes.

Maximum multimedia

Connect up audiovisual devices, such as laptop, DVD player or digital camera.

One system fits all

Fit the whole system in rooms large or small with a projector that mounts directly above the interactive whiteboard, saving you vital space. Since the whole system is integrated, there's no need for complicated wiring or ceiling mounting.

SMART NOTES

Deliver engaging and interactive presentations with SMART Notebook software. SMART Notebook gives you access to thousands of digital images, templates, interactive content, and drawing tools. Through an easy to use interface you can create, organise, save notes, drawing and screen captures.

Use Colourful pens to write over notes and video. Access tools such as the 'Screen shade' or 'Spotlight' to help focus attention.

Come and visit us at GB Telecom and we can demonstrate the SMARTboards features within our very own boardroom.
