

The Innovative Interactive Whiteboard

Interactivity for flat panel displays SMART Board Interactive display frame

SMART.

The SMART Board interactive display frame provides interactive whiteboard functionality to existing plasma or LCD screens.

Connect to a PC or laptop and using DVIT™ Digital Vision Touch technology users can interact directly with the plasma or LCD display to control any computer application. Annotations can be made over any application or whiteboarding page in digital ink using a single pencil tool. Simply turn the pencil tool around to activate the eraser function.

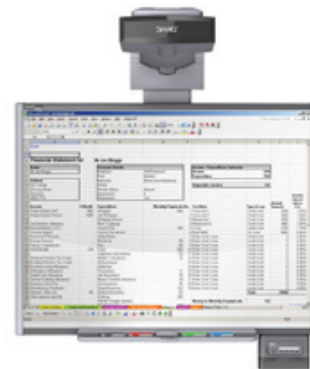

- Available in 42" - 65" sizes
- Compatible with a wide range of commercial flat panel displays
- Lightweight and glass-free frame
- 3 year warranty

The digital whiteboard The SMART Board 600i3 interactive whiteboard system

SMART.

The SMART Board™ 600i3 interactive whiteboard system acts as a projection screen for displaying a PC or laptop.

Interact with the display by using a finger to control on-screen applications. Pick up a pen from the SMART Pen Tray to make notes and annotations in digital ink over any application or whiteboarding page.

The 600i3 includes a SMART Board interactive whiteboard, a short throw UF55 projector and an extended control panel for inputting devices such as laptops, DVD players, document cameras and more.

- 64", 77" and 87" (widescreen) models
- XGA / WXGA DLP Projection
- 3 years on-site warranty, with a further 2 years return to base warranty on the board upon product registration
